

Off the Rails With Transformer

December 15, 2016 | By Daniel Fedkenheuer

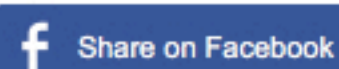

Concrete Wave recently teamed up with Transformer Rails to test out the world's first and most versatile, transformable grind rail. With the ability to skate the rail as a flat bar, round rail or bench and numerous height adjustments, Transformer Rails allow skaters to progress faster than ever before.

In this [video](#), Elephant Brand Skateboards team rider Colby Deluccia unleashes a barrage of tricks combined with one of the most unique styles out there on the six foot Transformer rail. With effortlessly unthinkable combos and unparalleled manual balance, Colby shows off how to lay the hammers down.

To learn more about Transformer rails, check this [piece](#) we did on them last month. or on their site at transformerrails.com
